Cambridge-Lee Industries LLC

We can ship your brass rod direct from our North American mill or offer you a JIT stocking program from our distribution centers nationwide.

The properties of Free Cutting brass have made it the standard for all machinable copper alloys.

- Minimize downtime, tool wear and breakage
- Tighter than standard tolerance on straightness and diameter
- Reduce drops with our custom lengths

- We inventory standard sizes and manufacture custom shapes to your print
- Rounds:
- Hex
- Square
- Rectangles

Experienced industry personnel to assist in forecasting and copper pricing solutions.

We also Provide:

- Alloys C314, C345, C353, C464, C485
- Copper Plumbing Tube
- Ask us about our Low Lead or Custom Alloy capability

Uses:

Ideal for applications requiring machining, roll threading, and knurling.
